//OUR LEGACY

KWA's long standing tradition of craftsmanship and innovation is met with a constant commitment to deliver superior performance and ultimate reliability.

The Southern California-based company has been designing and manufacturing high quality airsoft products for 30 years, including 1:1 scale MilSpec products for consumers as well as law enforcement, military, and government agencies around the globe.

We seek to challenge ourselves to exceed every expectation and provide the best user experience possible — from our products, to service and support.

//CRAFTSMANSHIP & QUALITY

Every KWA product is built to create a realistic experience for the user while redefining the airsoft industry. Since our inception, KWA has designed and engineered some of the highest performing and dependable airsoft products on the market.

Beginning with our patented 2GX gearbox design and NS2 gas system years ago, KWA has changed perceptions of what “out of the box performance” means. Every product feature & function has been meticulously engineered to recreate its firearm counterpart without sacrificing performance or reliability. Fire controls and take down procedures are faithfully replicated. No detail is overlooked.

Every product is subject to stress tests in real-world conditions to ensure reliable operation. Product feedback is field tested and improvements are implemented. The ever-changing demands of the market require constant evolution.

At KWA, we do not hide from innovation... we perfect it.

//NON-LETHAL TRAINING

KWA works with a variety of training centers plus military, local, state, and federal law enforcement agencies.

By offering products that are cost effective & reliable, KWA has advanced the development of airsoft into a non-lethal training alternative for military and law enforcement agencies around the world. KWA products are designed for operators who demand realistic replicas without sacrificing performance and durability.

KWA specifically designs its products to complement any training program. All KWA products use 6mm low impact BBs that minimize liability and maximize cost savings, making KWA the logical choice.

The way you train is the way you fight.

// FUNDAMENTALS

KWA products are designed to reinforce proficiency and survivability in tactical training programs.

Repetition and consistency are essential to operators who rely on trained core fundamentals to accomplish the mission. Recoil action, fire controls, and safety features are recreated for a more dynamic training experience without the fear of negligent discharges that can endanger lives — that's why law enforcement agencies and trainers worldwide depend on KWA products as a cost effective, force-on-force training tool.

//LAW ENFORCEMENT & MILITARY

//PREFERRED BY GOVERNMENT AGENCIES & LE/MILITARY AGENCIES AROUND THE WORLD

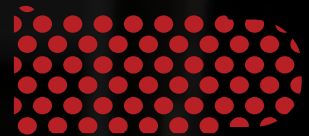

BENEFITS:

- Low start up & operating costs
- Economical per-round cost
- Realistic controls & weight
- Recoil action for muscle memory
- 1:1 specs fit standard duty gear
- MilSpec accessory mounts
- Precision engineered
- Dedicated support

Ronin

// THE FIRST LINE OF MODULAR AEG RIFLES IN THE MARKET

Meet the all-new Ronin M-Series, a new line of modular AEG rifles. The Ronins are the first airsoft rifles to hit the market that are specifically designed with an interchangeable family of complete upper receivers. The Ronin M-Series will have multiple variations for specific player needs and tastes, and is engineered with KWA's latest AEG 2.5 & AEG 3 gearboxes to combine the industry's most reliable systems with more aggressive designs.

All Ronin M-Series rifles come with new custom, sleek, lightweight rails capped off with aggressive lines at the very front — plus a new-look mock suppressor. The sleek aluminum rail design also helps provide comfort and stability as you go from CQB to field play at 330-380 FPS with the AEG 2.5 adjustable system.

Highlighted by a Switch Life Extender to minimize the wear and tear on trigger contacts, the AEG 2.5 & 3, provide MilSim & CQB players with the ultimate AEG rifle to outlast the competition.

Additional new features include magazine cutoff compatibility, combined with adjustable FPS for users to customize their KWA AEG rifle to their own specifications using the new VPS tool included in every box.

// RŌNIN M-SERIES FEATURES:

- Tanker-style stock (Ronin 6 PDW/new)
- PTS® Enhanced Polymer Stock (Ronin 10 SBR & Ronin ML Recon)
- Custom-designed, lightweight, M-LOK rail (Ronin ML Recon/new)
- Improved high-torque motor (new)
- Ambidextrous fire selector (new)
- Enlarged trigger guard (new)
- Custom mock suppressor (new)
- Full aluminum rail (new)
- Front & rear PTS® Enhanced Polymer flip-up sights
- Rear-wired battery compartment
- Upgraded high-speed gear set (new)
- Switch Life Extender to prevent contact burnout
- Fully adjustable FPS through stock with included quick change tool (AEG 2.5)
- 30/120rd. magazine cut off compatibility (AEG 3)
- PTS® Enhanced Polymer Grip
- Rotary hop up
- One-piece upper receiver

// THE RŌNIN EXPERIENCE

The first of its kind, the new AEG Ronin models feature modular upper receivers. Operators can swap complete upper receivers with any KWA AEG 2.5 or AEG 3 rifle to create the perfect AEG weapon.

Whether it's the Ronin Recon ML (M-LOK) upper receiver on the Ronin PDW lower receiver to create an aggressive front end with a tanker-style stock, or surveying the playing field with the Ronin 15 Carbine Kit locked onto the AEG 3 RM4 lower receiver to create a more custom experience – you'll have the ability to take on any role your squad needs using a multitude of configurations in under 45-seconds.

“New eras don't come about because of swords, they're created by the people who wield them.” - Nobuhiro Watsuki

COMPATIBLE WITH VM4A1

// AEG 2.5

Taking the standard AEG to a new level of efficiency, the AEG 2.5 by KWA is highlighted by a Switch Life Extender to minimize the wear and tear on trigger contacts, combined with adjustable FPS for users to customize their KWA AEG rifle to their own specifications.

// AEG 3

This updated ERG system, now known as the AEG 3, boasts all of the newest features of the AEG 2.5 system, PLUS simulated recoil with KWA's patented Kinetic Feedback System. The AEG 3 combines the ultimate AEG rifle with a more cost-effective training solution to provide players and professionals the best airsoft experience.

// RŌNIN 6 PDW

// RŌNIN 15 CARBINE KIT

// RŌNIN 18 SPR KIT

// RŌNIN ML RECON

// RŌNIN 10 SBR / KIT

// ULTIMATE MODULARITY

AEG Ronin models feature modular upper receivers. You can swap full upper receivers with any AEG 2.5 or AEG 3 rifle to create the perfect AEG rifle. Complete rifles are available with the 6" PDW, 10" SBR, or 15" Recon upper receivers.

// COMPLETE UPPER KITS

Ronin upper receiver kits, complete with outer and inner barrels and aluminum free float KeyMod rails allow you to customize your AEGs 2.5 or 3 in seconds without the need to purchase a second rifle. Kits are available in 10" SBR, 15" Carbine, and 18" SPR lengths.

// CRANE

Six-position, retractable stock with enlarged butt plate for increased battery housing and traditional SOPMOD look.

// TANKER-STYLE

Custom-designed, three-position Tanker-style stock with metal guide rods, reinforced polymer body, and an efficient/rapid-access battery compartment.

// PTS® ENHANCED POLYMER STOCK

Manufactured with authentic Dupont™ Zytel® polymer for superior wear and damage resistance.

//KWA GUARDIAN RAIL KIT

Brand new to KWA's lineup is the Guardian Rail Kit for KM4 Series rifles, including the KM4 CQRs and the KM16 Battle Rifle. The kit takes the best components of familiar AEG 2 models and combines them into an aggressive, full metal rail kit, complete with an outer barrel and a stubby metal mock suppressor.

With the Guardian kit, you can transform your KWA AEG 2 into a beast that will dominate the competition on any field.

KIT INCLUDES

//KWA ACCESSORIES

Precision Made

Superior Accuracy

Eco-Friendly

//KWA BIO BBs (.20g/.25g/.28g)

You no longer have to wrestle with bagged BBs or worry about inadvertent spillage in your tactical bag. Stay eco-friendly and field compliant without sacrificing performance with the all-new KWA biodegradable BBs. The three different available weights come in three distinct colors for easy recognition in your KWA Speedloader. Now you can play or train with BBs that provide the same superior performance you've come to expect from KWA BBs.

//KWA SPEEDLOADER

The KWA Speedloader is perfect for quickly refilling BBs in your pistol, rifle, or SMG magazines. It fits perfectly in an M4 magazine pouch and has a 460 round capacity. Now with a brass nozzle, this durable and convenient unit is considered the best speedloader on the market.

//KWA ACCESSORIES

//KWA APPAREL

Get your hands on some new KWA Apparel! The super soft 65/35 cotton/polyester blend has the athletic feel of a tri-blend for a longer life span. It's durable enough to withstand the wear and tear of Saturday afternoon games on the field or Saturday nights out with your friends.

//KWA PATCHES

Represent your favorite brand on or off the field with the KWA & Ronin logo patches! The patches boldly display your KWA pride and are made of durable PVC with a hook & loop backing to easily attach to your rig, jacket, or gear bag.

//KWA ACCESSORIES

//KWA SUNGLASSES

The KWA Wayfarer style sunglasses are here! These stylish, lightweight, and comfortable shades are made from high quality ABS polymer, and also offer complete UV400 protection.

//KWA GUNSMITH'S BENCHMAT

The KWA Gunsmith's Benchmat has long been a must-have for home work on your KWA pistol, rifle or SMG. The deep grooves help catch any stray parts during cleaning and disassembly, and the ultra thick and durable rubber will protect your counter space from grease and grime.

//KWA COMBAT CASE

The KWA Combat Case for the iPhone 6 and iPhone 6S is ultra durable, snaps on for easy installation, and is made of high grade polymer that will meet the demand for protection that your phone deserves.

//FEATURING: DTA AIRSOFT

KWA thanks Double Tap Airsoft (DTA). The team was formed in 2010 by military veterans and MilSim enthusiasts, to create a brotherhood among strangers.

The DTA Crew has proudly used KWA weaponry since its inception and is recognized as the first official KWA Team/Brand Ambassadors.

This deep respect for the KWA brand is represented by the KWA 1911 in the center of the DTA symbol and was placed there to commemorate the first pistols used by the original six members.

Photos by: Relic_DTA. Special thanks to @Relic_DTA for his mastery behind the lens.

Original Six DTA Members represented by the six arrows displayed on the DTA symbol:

Relic (DTA-1)	@Relic_DTA
Pyro (DTA-2)	@Pyro_DTA
Yankee (DTA-3)	@Yankee_DTA
Ginger (DTA-4)	@Ginger_DTA
Dodd (DTA-5)	@Dodd_DTA
Box (DTA-6)	@Box_DTA

Additional team affiliates are Landry Willis, Alonzo Gant and Amber Doucet.
